product benefits

With our compact WTR 450 you are able to measure temperatures in the food industry under ideal space utilization. The sensor has a sealing cone below the connection thread, which is aseptically adapted with the help of our welding sleeve (ZEM 150 or KEM 150). You will benefit from the very high quality and durability of the sensor, which is achieved by using high-quality materials. Even in rough industrial environments this sensor can be used without any problems.
