process adaption and accessories

process adaption

features

- dead space- and elastomer free process adaption for temperature sensor WTR150, WTR350
  WTR450, level switch NGS150, level rod probes NST150, NST250, ...
- modulare process connection system
- hygienical compatible mounting in cases and pipelines in all areas of the food
  and pharma industry
- EHEDG and FDA-conform
- material 1.4404 (316L), other materials on request
- on request deliverable with material certificates

assembly advice

Important: use only welded sleeves of company promesstec, to reach a secure and optimal measuring point.
Pay attention to the max. acceptable clamping torque at assembly.

process connection for G1/2" sealing system
